This article describes the Internet Gopher: why it is needed, how it is used, its genesis and early evolution, the underlying protocol (and the new Gopher+ protocol), Gopher's role as a campus-wide information system (CWIS), and its emerging role as an Internet-wide information system. The article also discusses navigational enhancements (e.g., Veronica), organization and quality of service issues, privacy and security concerns, electronic publishing issues, distribution of multimedia information, related client and network information technologies, and Gopher's future.

Publication Information

Published on an irregular basis by the University Libraries,
University of Houston. Technical support is provided by the
Information Technology Division, University of Houston.
Circulation: 6,403 subscribers in 56 countries (PACS-L) and 1,428
subscribers in 42 countries (PACS-P).

Back issues are available from LISTSERV@UHUPVM1 (BITNET) or
LISTSERV@UHUPVM1.UH.EDU (Internet). To obtain a list of all
available files, send the following e-mail message to the
LISTSERV: INDEX PACS-L F=MAIL. The name of each issue's table of
contents file begins with the word "CONTENTS."

The first two volumes of The Public-Access Computer Systems
Review are also available in book form from the American Library
Association's Library and Information Technology Association
(LITA). The price of each volume is \$17 for LITA members and \$20
for non-LITA members. To order, contact: ALA Publishing
Services, Order Department, 50 East Huron Street, Chicago, IL
60611-2729, (800) 545-2433.

The Public-Access Computer Systems Review is an electronic
journal that is distributed on BITNET, Internet, and other

computer networks. There is no subscription fee.

To subscribe, send an e-mail message to LISTSERV@UHUPVM1 (BITNET) or LISTSERV@UHUPVM1.UH.EDU (Internet) that says:
SUBSCRIBE PACS-P First Name Last Name. PACS-P subscribers also receive two electronic newsletters: Current Cites and Public-Access Computer Systems News.
